## ROTARY EASY BENDER XR

Fully automated rule-processing system for bending, notching, lipping and cutting of radial cutting rules with a diameter of 487 mm .

- High accuracy due to CAM fine-adjustment
- Tool changes of 3 and 4 pt. in less than 5 minutes
- Full conversion of CAD data by means of a CFF2 interface
- Reduces production times for complex designs up to $500 \%$
- Increases productivity up to 100 \%
- Reduction of waste by automated processing
- Relief notches are placed where they are needed. This increases the rule stability.
- Switchable design from 3-4 pt.

Technical data:

| Rule thickness | 3 pt and 4 pt |
| :--- | :--- |
| Rule height | 23,8 to $26,5 \mathrm{~mm}$ (with tool change) |
| Rule diameter | 487 mm |
| Data formats | CF2, CFF2, DXF, DDES |
| PC | Pentium IV, 500 Mhz., 2,4 GB ROM, 256 MB RAM, <br> LAN Card, 17" LCD Monitor |
| CAM-Software | Windows XP Professional |
| Power supply | $230 \mathrm{~V} \mathrm{50/60} \mathrm{Hz}$. |
| Air pressure | $6-7 \mathrm{bar} ; 30 \mathrm{l} / \mathrm{min}$. |
| Dimensions | $1350 \times 850 \times 1800 \mathrm{~mm}$ |
| Weight | 500 kg |
